## **DATAFROMSKY LAUNCHES PARTNERSHIP WITH COWI**

RCE Systems, a Czech-based company providing the DataFromSky service, is happy to announce a new strategic exclusive partnership with COWI in Denmark, Sweden, Norway, Finland and Iceland.

COWI is a leading consulting group with a 360° approach. The Danish company has a long-proven record of success, serving customers from the Nordic countries and the whole world in the field of civil engineering, including traffic analysis. The partnership enables COWI to provide more accurate and comprehensive traffic information and analysis using DataFromSky. Hence, COWI will help DataFromSky grow professionally and reach more markets.

We are looking forward to this new relationship with COWI. By moving forward we hope to satisfy needs of even more customers from all sectors, who need traffic data to make informed and efficient decisions.

DataFromSky is a solution for extraction of traffic data from aerial video, particularly that recorded by drones or aerostats. The resulting data includes vehicle counts, classifications, speeds, accelerations, capacities, flows, times and many other types of information. DataFromSky is a project of RCE Systems, s.r.o. based in Brno, Czech Republic. The project was started in 2014 at the time of founding the company. RCE Systems the company is oriented towards embedded computing projects and computer vision applications.
